UFUK YILMAZLAR

WEB DEVELOPER

PROFILE

Hi here! I'm Ufuk from Turkey developing web and mobile applications along with language studies like translation(EN-TR). Personally I believe the sacredness of improving myself. In this perception, I always strive to develop my skills on the shining world of software and language.

My language skills help me for english software documentations when needed. This is why it is easier for me to develop websites and present them in a proper way. All of these contribute my progress a lot and will continue to do so. And I'm proud of it as a language and tech lover person.
